PROJECTS

ThinkPad - A Note Taking Application

📅 Ongoing

- Created ThinkPad, a MERN stack application for managing text-based notes, featuring a clean and intuitive user interface.
- Designed responsive layouts with Tailwind CSS and implemented CRUD operations for seamless note creation, editing, and deletion.
- Developed secure backend APIs with Express and MongoDB, ensuring smooth data handling and reliable user authentication.
- Optimized performance by leveraging Redux for state synchronization and maintaining a scalable application architecture.
